

# QuickAssetsGlobal - Institutional Mining Expansion Plan (AWS)

**Dear AWS Team,**

We are writing to present our ambitious and highly scalable project to you. QuickAssetsGlobal aims to establish a decentralized and global mining infrastructure, operating 24/7 with a daily revenue target exceeding USD 400 million. Our commitment is to leverage state-of-the-art AWS infrastructure to support and optimize our mining and DeFi operations.

## **Project Objectives**

- Establish a massive decentralized mining infrastructure.
- Integrate blockchain technologies, liquidity pools, and market intelligence.
- Build an automated system that can scale, optimizing profits across a range of cryptocurrencies and tokens.
- Utilize AWS tools such as EC2, S3, Lambda, and Glacier to maximize security, reliability, and scalability.

## **AWS Utilization**

We intend to leverage the following AWS services for our operations:

- EC2 Instances (P4d and G5) for powerful computing.
- S3 and Glacier for secure data storage and long-term archival.
- Lambda for automated smart contract execution and management.
- CloudWatch and Grafana for real-time monitoring and performance optimization.
- Global Accelerator for low-latency access to our mining operations worldwide.

## **Conclusion**

We believe that AWS provides the perfect ecosystem to support our vision of large-scale, decentralized mining operations. We are confident that with your infrastructure and support, QuickAssetsGlobal will be able to set new standards in profitability, transparency, and innovation within the mining sector.

We look forward to discussing this opportunity with you in more detail.

Sincerely,

QuickAssetsGlobal Team
